either replacing or lubricating. As to the rear wheel, you may have too much oil in the differential housing. This should not have more than two or three pints of oil in it.

Appearable Editor:

Is there any school where a woman can learn the mechanism of an automobile?

E. W. R. See advertising columns of this paper.

When slowing down my Buick 1916, a knock, which at once ceases if spark is retarded, is very noticeable. The car has just been thoroughly cleaned, cylinders, spark plugs, &c. Could the knock be due to governor mechanism. I doubt that the governor is at fault as the knock, which at properties and the same speed is much greater the first telephone work from 1875 until he retired in 124, starting in the business within two years after the first telephone company in New York City was admitted to the and when one shifts with due regard to car speed and engine speed. That is, it is proper to shift when running. See advertising columns of this paper.

When slowing down my Buick 1916, a knock, which at once ceases if spark is retarded, is very noticeable. The car has just been thoroughly cleaned, cylinders, spark plugs, &c. Could the knock be due to governor mechanism in the car?

F. D. C. This is probably caused by carbon. I doubt that the governor is at fault as the knocking ceasing, even if the spark is not retarded, would elimin.
